No person will be allowed to act as Judge who is directly or indirectly interested in the result of a Race, or who is related to any person owner in any animal competing in such Race.

Premiums for horses raised or owned in this State will include all horses raised or owned in California East of the watershed of the Sierra Nevada Mountains.

INDEPENDENT NOMINATIONS.

The California Independents yesterday nominated:

For Governor, Gen. John Bidwell. Lieutenant Governor, Romualdo Pacheco.

Secretary of State, Wm. Roush; Controller, L. E. Crane; Treasurer, F. Baehr; Attorney General, Pete Van Clief; Surveyor General, Ed. Twitchell; Supreme Court Clerk, Paul Morris; Subt. of Public Instruction, J. M. Gwynn.

The Independents have done as well, if not better than the Republicans, though the latter is a strong and a good ticket. But the political situation is changed. The Independents will carry the day, we believe.

Get your shot-guns ready. Rancroft & Co., of San Francisco, have engaged a book agent who speaks fifteen different languages.

Boots and Shoes, Etc.—It is an established fact that these articles can not be got along without. Hence, it necessarily follows, that in the purchase of them we should not only look to price but to quality, for none of us desire to pay an extortionate price for an inferior quality of boot or shoe. There is no doubt but that John Sunderland can give us complete satisfaction in both respects. Then to Sunderland's, (on Virginia street), we will go, for boots, shoes, slippers, and all goods of that class.*

MICA IN NEVADA.

Although the fact was not referred to in the last report of our State Mineralogist, it has been known for more than a year that what seems to be a valuable deposit of mica is to be found in Ruby Valley. We have seen specimens of the product of the deposit, taken from a depth of eight or ten feet from the surface, the flakes of which were three or four inches square, and as clear and free from blemish as the average of the isinglass of commerce. Late developments indicate that the deposit is large and valuable. Haynes and Oretchet, the locators of the mine, recently returned from a visit to Ruby Valley.

Mica is a silicate, which crystallizes in right rhomboidal prisms, which naturally separate in flakes parallel with the base of the crystal. These flake or sheets may be subdivided until it would require thousands of them to make thickness of an inch. Bodies from which such sheets may be taken are sometimes found four or five feet square, without a crack or blemish. Mica is of various colors—white, green, red and black. The most valuable, of course, is the silver-white mica, which is confined to granite and other igneous rocks. In fact, it is a constituent of granite, gneiss, mica slate and some other kindred formations. It is found in veins, and also in small and incidental deposits derived from the destruction of the original formations to which it belonged. It exists all over the world, but veins from which large and marketable sheets may be taken are rare. In Siberia veins have been found three feet in thickness and of excellent quality. Even thicker deposits are worked in other portions of Europe, but they are mixed with foreign matter. White mica is found in several localities in New Hampshire, and also in small quantities in some other States. The consumption is very considerable throughout the world, and is worth about one dollar per pound. If the width of the vein in Ruby Valley is twelve feet, or one-quarter of it, and is of the compact structure and quality represented, a very valuable property has been added to the mineral wonders of the State, and one which we trust may make millionaires of its proprietors. — *Virginia Enterprise*, June 22d.

MACKEY-FAIR.—We yesterday paid a visit to Messrs. Mackey & Fair's mine, in course of construction in the mountains, about 11 miles from Reno. This enterprising firm have purchased a very large tract of land, the timber seemingly interminable and inexhaustible, and which contains the best and greatest varieties. The rapidly growing wealth of the bonanza has given an immense impulse to the lumber trade in and around Reno. Here they have erected two large saw mills, capable of manufacturing 10,000 feet of lumber per day and 20,000 by night. The lower mill is run 12 hours in the day time and only cuts 10,000 feet. The machinery used will give some idea of its adaptation for extensive work, namely: One double circular saw, one edger, two boilers and one engine. Blacksmith and carpenter shops are connected with the mill. About 200 men are constantly employed. The conveniences for the comfort of the workmen are worthy of all praise. To a superficial observer the mills look small; but close observation shows that it does much work, and does it well. There are erected two large reservoirs on the summit, one being 300 feet long with 15 foot head, the other 1200 feet long with 6 foot head. The flume when completed will be twenty miles in length, and it is for the early completion of this, that the mill is run day and night. The 800-foot dump will be at Huffer's Station, the most accessible point on the railroad. We must not forget to mention that Jno. R. Knox is the Superintendent of the mills; a gentleman who is a thorough mill man, comprehending the business in detail, and being held in high regard by his men.

HIS CONVICTION.—We learn that Rev. S. P. Kelly is recovering rapidly. He has not the genuine small-pox but a light case of varioloid.

WOOD ON FIRE.—On Tuesday afternoon the C. P. R. R. wood, about one half mile west of Woodbridge, caught fire from a passing engine. The special train towards Reno on approaching the fire stopped, and Conductor Carmichael and crew at once took hold in good earnest to extinguish the fire and check its progress to the adjoining piles opposite the track. Several times the ties were on fire and the rails commenced to warp, but notwithstanding Mr. Carmichael went through the intense heat and poured water on the ties and rails. All of his crew worked hard and with a determined will to save the Company's property. On the arrival of the train, Mr. McFee, who is loading square timbers near Woodbridge, made a crevice from the flume above to turn water on the burning wood and worked along till the train was able to pass by. When our informant left on the train the section gang had arrived and taken charge of the burning wood pile. The damage probably did not exceed over twenty cords; but for the timely arrival of the train about one hundred cords or more would have been consumed.

STAGE ACCIDENT.—Last evening about 5 o'clock as the Susanville stage was nearing Reno, in coming down a steep grade, the fore wheel on the right hand side ran off, overturning the stage, and severely, though not seriously, injured one lady passenger—bruising one leg. The driver came in with two horses, and returned to the scene of the accident with another wagon.

BULLION.—A bar of 408 ounces of bullion, 883 fine, was brought in from Peavine last evening, on account of the Con. Poe.

WARM.—We are having hot weather. A man earns his living by the sweat of his brow these times.

NEW GOODS.—Mrs. McNeely has just received a new and beautiful lot of goods of the latest styles and colors, consisting of ready made suits, dry goods, muslins, prints, white goods of all kinds, table linen, towels, napkins, black silk, hosiery, two-button gloves, gent's kid gloves, also handkerchiefs, ladies handkerchiefs, parasols, Spring shawls, corsets, zephyrs. Millinery and fancy goods of all kinds.

NOTICE.—Mr. Nels. Greenman is no longer our authorized agent. Our patrons will govern themselves accordingly. St. Lee & Co.
